

CASE STUDY:

RIVERVIEW

School District

MAXIMUM COST SAVINGS PROJECT

Riverview School District used ultra-efficient lighting technology and modern controls to implement a project that saves almost \$100,000 per year.

The District completed this project utilizing their current energy expenditures as a facility modernization fund.

PROJECT SNAPSHOT

Riverview School District teamed with TEN to modernize its Junior/Senior High School. The school district's goal: to maximize savings by using the most modern new energy fixtures, ensuring the students continued to learn in a safe, modern, energy-efficient school.

TEN selected ultra-reliable equipment that would maximize both short-term and long-term savings. TEN then implemented the upgrades to reduce energy costs, while making the school more comfortable for staff and students.

CUSTOMER PROFILE

Riverview School District is a progressive school district, dedicated to learning, character, innovation, and social responsibility. This project is aligned with all of the district's core values.

This project will save our district almost \$100,000 per year in energy costs—guaranteed by TEN—which we will reinvest in our school and our students.

— Dr. Margaret Dininno, Superintendent of Schools

TECHNICAL COMPONENTS

- Installed state-of-the-art LED lighting systems
- Installed new rooftop HVAC units
- Upgraded modern lighting control systems
- Upgraded HVAC control systems

PROJECT RESULTS

\$22,000

Rebates applied for and secured

\$97,000

Guaranteed annual savings

\$1.2 MILLION
