

# CONTINUOUS EFFICIENCY

TEN's innovative approach to energy management will allow you to develop projects that will modernize campus facilities, reduce operating costs and achieve sustainability goals at a pace that you can afford.

## THE RESULT

Phased, targeted, creative projects that are developed in partnership with your facilities team and delivered quickly and efficiently.

# \$10 MILLION

**TEN has helped higher education clients create over \$10 million in savings over the last five years.**

## WHAT IT MEANS

TEN will help you create and deliver projects that save money, address urgent deferred maintenance needs and allow you to reach campus sustainability goals.

- + Your priorities are our priorities.** By listening to what you and your team want to achieve, we help you create successful projects and build a long-term process to deliver projects year-after-year.
- + We are vendor neutral.** We explore all options but respect your desire to maintain consistency and familiarity in overall systems management.
- + We work with local contractors who you trust.** These contractors know your facilities, your procedures and your campus.

## PROJECT HIGHLIGHTS:

- Chilled Water Plant Optimization
- Campus-wide LED Blitz
- Controls Upgrades
- Boiler Replacement
- Retrocommissioning

- TEN defines itself by the ability to be flexible and focus on the needs of our customers.
- We are backed by the financial strength, technical experience and vision of Duquesne Light Holdings.
- We offer in-house lighting design services, experience in PPA and alternative energy and, if desired, consultation on financing options.
